**SOVATEC
HIGH EFFICIENT
FANS**

**SOVATEC
HOCHEFFIZIENTE
VENTILATOREN**

“WHERE QUALITY RULES, WE ARE NOT AFRAID OF ANY MARKET LEADER!”

„WO QUALITÄT
ENTSCHEIDET, HABEN
WIR KEINEN
MARKTFÜHRER ZU
FÜRCHTEN!“

The SOVATEC Produktions GmbH designs and produces electric motors and axial fans according to European quality standards.

Our long term approved module system with Multi Airflow Direction (MAD) combines ventilation and drive technology, for individual complete applications as well as spare parts solutions.

The SOVATEC product ranges provide cost efficiency, adaptable systems, high durability and a production facility working with national and international requirements (e.g. ErP, CE...).

Our worldwide team is working in seven different countries and looking forward to support you with fast solutions on your ventilation and drive technology requirements.

SOVATEC implements a system of continuous product improvement and creating design for highest customer value. To keep our Austrian production facility competitive, we are working with a high degree of automation and newest measurement and test equipment.

SOVATEC offers:

- high efficiency
- flexible air flow direction (puller / pusher)
- high protection classes
- low noise levels
- high durability
- special corrosion-resistant materials

Die SOVATEC Produktions GmbH entwickelt und produziert Elektromotoren und Axialventilatoren nach europäischen Qualitätsstandards.

Unser langjährig entstandenes Baukastensystem mit Multi Airflow Direction (MAD) verbindet Ventilations- und Antriebstechnik für Ihre individuellen Komplett- und Ersatzlösungen.

Die SOVATEC Produktreihen bieten kostengünstige Effizienz, anpassungsfähige Systeme, hohe Lebensdauer und einen Fertigungsstandort unter nationalen und internationalen Richtlinien (ErP, CE..). Unser weltweit präsent Team arbeitet in sieben Ländern und freut sich, schnelle Lösungen für Ihre Aufgaben in der Ventilations- und Antriebstechnik zu finden.

SOVATEC verbindet den Anspruch einer kontinuierlichen Verbesserung der Produkte mit der Entwicklung den höchsten Wert für Ihre Kunden zu schaffen. Um unseren Produktionsstandort in Österreich wettbewerbsfähig auszurichten, arbeitet SOVATEC mit den neuesten Mess- und Prüfeinrichtungen.

SOVATEC präsentiert Zuverlässigkeit in:

- Hohe Effizienz
- Flexible Luftansaugrichtungen (saugend / drückend)
- Hohe Schutzarten realisierbar
- Geringe Geräuschentwicklung
- Lange Lebenszeit
- Spezielle korrosionsbeständige Materialien

EFFICIENCY & VALUE EFFIZIENZ & WERT

HIGHEST EFFICIENCY GUARANTEED

The research and development of products follow to our own guidelines and specifications. The verification of the performance data of the model ranges are being processed with application realistic configurations and not under optimized laboratory conditions.

We offer electronic motors in AC, DC and EC configuration.

The fans fulfill their requirements in a stable range of the characteristics diagram with a motor efficiency in connection to a system related electronic control device.

The MAD fan range is designed for use in stationary, industrial applications. A fan unit consists of an electric

motor and plastic fans of polyamide 6 with 30% glass fibre and diameters between 250 and 1000mm. The available drives are single phase motors or three phase motors with a power from 60W to 3,4kW. The electric motors are configured for the temperature class 155 (insulation class F) at an operation with a frequency of 50Hz and/or 60Hz. The protection is IP44 or IP66. The electric motors can be voltage controlled and may also be used in combination with electronic as well as transformer controls

For further information regarding technical parameters and conditions, please use our product specific data sheets or contact us, directly.

Applications:
air conditioning, ventilation and drive technology

HÖCHSTE EFFIZIENZ GARANTIERT

Das Produktspektrum wird nach eigenen Vorgaben entwickelt und realisiert. Die Leistungsdatenerfassung der einzelnen Baureihen erfolgt jeweils in einsatznaher Konfiguration und nicht unter optimierten Laborbedingungen.

Elektromotoren werden von AC-Antrieben mit Synchronmaschinen über DC bis hin zu EC-Lösungen angeboten. Die Ventilatoren erfüllen die Aufgaben im Bereich einer stabilen Kennliniencharakteristik und einer Motorenefizienz in Zusammenhang mit einer systemorientierten Regelungselektronik.

Die MAD Ventilatoren-Baureihe ist für den Einbau in stationären Industrieanwendungen vorgesehen. Sie

besteht aus einem Elektromotor und Kunststoffventilatoren mit Durchmessern zwischen 250 – 1000mm aus Kunststoff gefertigt (Polyamid 6 mit 30% Glasfaser). Die Elektromotoren sind Einphasen- und Drehstrommotoren mit einer Leistungsaufnahme von 60W bis 3,4kW, ausgelegt für Isolationsklasse 155 (F) für einen Betrieb mit 50Hz und/oder 60Hz Netzfrequenz. Die Schutzart ist IP44 oder IP66. Die Motoren sind spannungsregelbar und können in Verbindung mit elektronischen wie auch transformatorischen Regeleinheiten betrieben werden. Weitere Umfeld- und Rahmenbedingungen sind in den produktspezifischen Datenblättern angegeben.

Anwendungsgebiete: Klima- und Lüftungstechnik.
